WOODPRO

**AFFORDABLE QUALITY AND CUSTOMISATION
WITHOUT ANY ADDITIONAL CHARGES!**

WELCOME

WOODPRO offers log cabins, garages and gazebos at **affordable quality**.

And with us, you will not be faced with any unpleasant surprises. Where you often incur additional costs such as nail sets, foundation beams, roofing, double glazing and delivery, etc., this is **all already included with Woodpro**.

Our production facility covers an area of more than **70,000 m²** and we produce many thousands of log cabins every year. We control the entire production process ourselves, which enables us to offer the best **quality and service**.

We only use **high-quality spruce wood**, which is extracted from the coldest areas. As a result, trees grow slowly and the annual rings are closer together. This makes the wood more stable and durable.

We also dry the wood so that the top-hung and shrinkage of the wood is limited. Windows, doors and posts are laminated to prevent warping.

Have fun viewing and designing!

ALL MODELS ARE AVAILABLE IN MORE THAN 100 SIZES

You can choose from:

Flat roof

Apex roof

You can choose from:

Canopy left, right, front or rear.

Choose your (optional) size of canopy there. You can choose between: 150 cm, 200 cm, 250 cm, 300 cm, 350 cm, 400 cm, 450 cm or 500 cm.

You can choose from:

Choose your (optional) walls under the canopy. You can choose between: 150 cm, 200 cm, 250 cm, 300 cm, 350 cm, 400 cm, 450 cm or 500 cm (depending on wall thickness).

THE (COLOUR) TREATMENTS

Pressure impregnation *(low maintenance)*

The wood is placed in a large boiler, filled with impregnating agent, and is vacuum drawn. This causes the impregnating agent to be pressed into the wood.

Pressure impregnated wood is low maintenance and can be kept for at least 10 years in all weather conditions. Also, in principle, it no longer needs any treatment, but you do extend the lifespan of the woodwork and keep the look fresh and beautiful if you do treat it. It is best to treat pressure impregnated wood with a wood oil. This is easy to process and is absorbed nicely.

Tip! If your log cabin is not easily accessible on one or more sides, we recommend having your log cabin pressure impregnated.

Windows and doors are not pressure impregnated. However, you can choose to have them pre-treated or to have them delivered completely painted.

Brown

Spray impregnation

(pre-treatment)

With spray impregnation, all interior and exterior surfaces are pre-treated with an impregnating agent (primer). You can choose from four different transparent colours. In addition to these colours, you also have the option of having us treat your product with a colourless primer.

BENEFITS:

The inside of your log cabin and the parts that are no longer accessible after assembly are protected and you do not need to stain them in the future.

With this treatment, your cabin is already provided with a primer.

Your log cabin is immediately protected against mould and decay processes after assembly. Your cabin will need to be stained on the outside within 12 months. Within 6 months if white, and as soon as possible if colourless.

Choose from five colours, and you can choose multiple colours:

Windows/doors: 1 colour

Walls/roof: 1 colour

Floor: 1 colour

So in total, you can choose a maximum of three colours per cabin.

Colourless

White

Graphite grey

Windows and doors

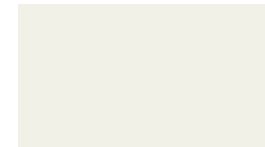

If desired, we can paint your windows and doors for you.

- We stain your windows and doors (exterior and interior) in two layers
- 5-6 years protection
- We work with the quality mark: Johnstones

You can choose from:

RAL 7037 - Dusty grey

RAL 9010 - Pure white

WOODPRO

**ALL PRODUCTS ARE
DELIVERED UNTREATED
AS STANDARD**

Oak brown

Light grey

With opaque white stain, it is possible that brown / yellow stains (resin from the trunk) become visible.

Despite the use of an impregnating agent and stain, this is unavoidable and therefore no reason for complaints.

www.lomaxwoodgardenrooms.co.uk

THERE ARE MANY BENEFITS AT WOODPRO INCLUDED AS STANDARD IN THE PRICE

Includes complete roof package: EPDM

Complete EPDM package: rubber roofing, roof outlet and sealant included. Also included are wide aluminium roof trimmings for finishing the roof edges on flat roofs.

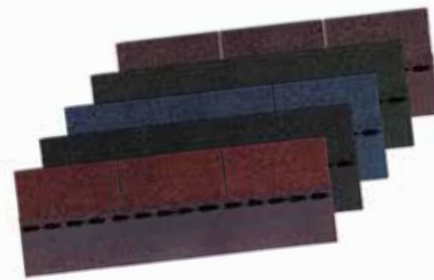

Double glazing

All windows and doors come with double glazing.

Dried and laminated

All the wood is dried to reduce shrinkage. In addition, the windows, doors and posts are laminated to prevent warping as much as possible.

Included for free: choice of five colours of shingles

If you choose an apex roof, the shingles are included in the price. Here, you can choose from the colours: blue, brown, green, red or black.

Mounting and fixing materials

All mounting and fixing materials are included.

Stacked wood construction system

In all our log cabins, the wall sections are stacked on top of each other and no nails or screws are needed. The log cabins are manufactured with a high wind and watertight corner connection.

Wall thickness

28 mm

Wall thickness

44 mm

Wooden interior floor (optional)

The wooden interior floor comes with pressure impregnated beams, 19 mm floorboarding and is finished with beautiful decorative skirting boards.

Posts, feet and foundation beams

All posts are laminated (prevents warping) and are 9 x 9 cm thick. Posts are delivered with pressure impregnated wooden feet. Pressure impregnated foundation beams are included as standard with every log cabin.

HIGH-QUALITY FINISHING OF WINDOWS AND DOORS

Double glazing

All windows and doors come with double glazing.

Cylinder locks

All doors are equipped with a high-quality cylinder lock, including a set of keys.

Window handles and expanders

Windows can be opened by means of a button. The expanders of the casement windows are adjustable, so that you can open the window ajar or completely. Because of the pin and hole connection, the window does not break when there is wind. The espagnolette in the frame ensures that your window is tightly closed along its entire length.

Window expander

This window expander is included with the windows. The expander allows you to open the window in the desired position.

Door handles

Door handles are finished in chrome and spring-loaded.

Doors

The doors have a thickness of no less than 4.5 cm.

Clickable cross bars

The rods have a clicking system. This is very useful when painting and cleaning the windows.

Wear strip

All doors are equipped with an aluminium wear strip with pre-drilled screw holes. This wear strip protects your sill.

Tilt and turn mechanism

Tilt and turn windows are very solid and have a high-quality mechanism.

Draught strips

All doors and windows are fitted with draught strips. These come with plastic foil that you can remove after painting.

Windows sealed

All windows are fully sealed by us.

Adjustable split hinges

The hinges are adjustable in all directions.

Covers for a beautiful finish

We supply covers for each hinge to give them a nice finish.

CONFIGURATOR EXPLANATION

1 Go to www.woodpro-configurator.com/brochure
Enter the product code next to the log cabin to open it. Start adjusting the cabin.

Tip! For each step, you will find the options at the bottom of the page. You can find info about the product by pressing the .

2

Make your log cabin bigger or smaller and choose the desired wall thickness. If necessary, add a canopy and walls to your log cabin. It is also possible to add a substructure, so that your log cabin has a double space with a partition.

3

Choose your roof type here.

4

Select your doors here and then position them in the wall at the desired location.

5

Select your windows here and then position them in the wall at the desired location.

6

Make your choice from the various (colour) treatments.

7

Optionally select your other choices and/or options here.

8

Here you can see the total overview. You can also send in your design here (without obligation) and ask questions if necessary.

You will immediately see your own designed log cabin, gazebo or garage in 3D. You will also see the price and floor plan. And... with us, everything is included! No hidden additional costs.

Window: W21

Product code: 28028

WOULD YOU PREFER TO START FROM AN EMPTY TEMPLATE IN THE 3D CONFIGURATOR?

Go to: www.woodpro-configurator.com/brochure

Then enter the following product code:

LOG CABIN/GARAGE WITH AN APEX ROOF

Product code: BHZ

LOG CABIN/GARAGE WITH FLAT ROOF

Product code: BHP

GAZEBO WITH AN APEX ROOF

Product code: VERZ

GAZEBO WITH FLAT ROOF

Product code: VERP

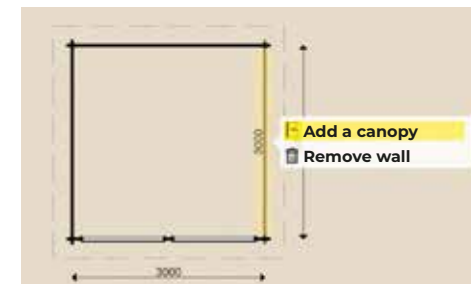

Additions can be made very easily in the following way:

Garage

You can add a garage door in step 4.

Canopy/gazebo

Add a canopy by clicking on the wall in the floor plan and select: add a canopy.

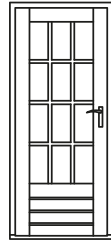

Tip! Both the walls of the log cabin and the dotted line of the canopy can be dragged with your mouse to achieve the desired dimensions.

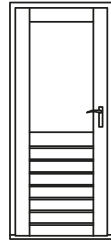

In the steps that follow, you can then add windows/doors, floor, treatments, etc. to create your dream log cabin, gazebo or garage.

WINDOWS AND DOORS

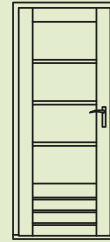

- All windows and doors are made with double glazing
- All hinges are adjustable and have covers
- All windows and doors are made with laminated wood (prevents warping)
- All rods can be removed (and can be put back on) by means of a clicking system
- Tilt and turn windows turn inwards
- For all benefits, see pages 10 and 11 of this brochure
